

Manual de como crear un repositorio en github

Repository name: nombre único (ej. mi-proyecto)

Description (opcional): breve explicación del propósito.

Haz clic en **Create repository.**

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

Repository name *

 **thian1993** ▾

/

Great repository names are short and memorable. Need inspiration? How about **turbo-adventure**?

Description (optional)

☒  **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐  **Private**
You choose who can see and commit to this repository.

Initialize this repository with:
Skip this step if you're importing an existing repository.

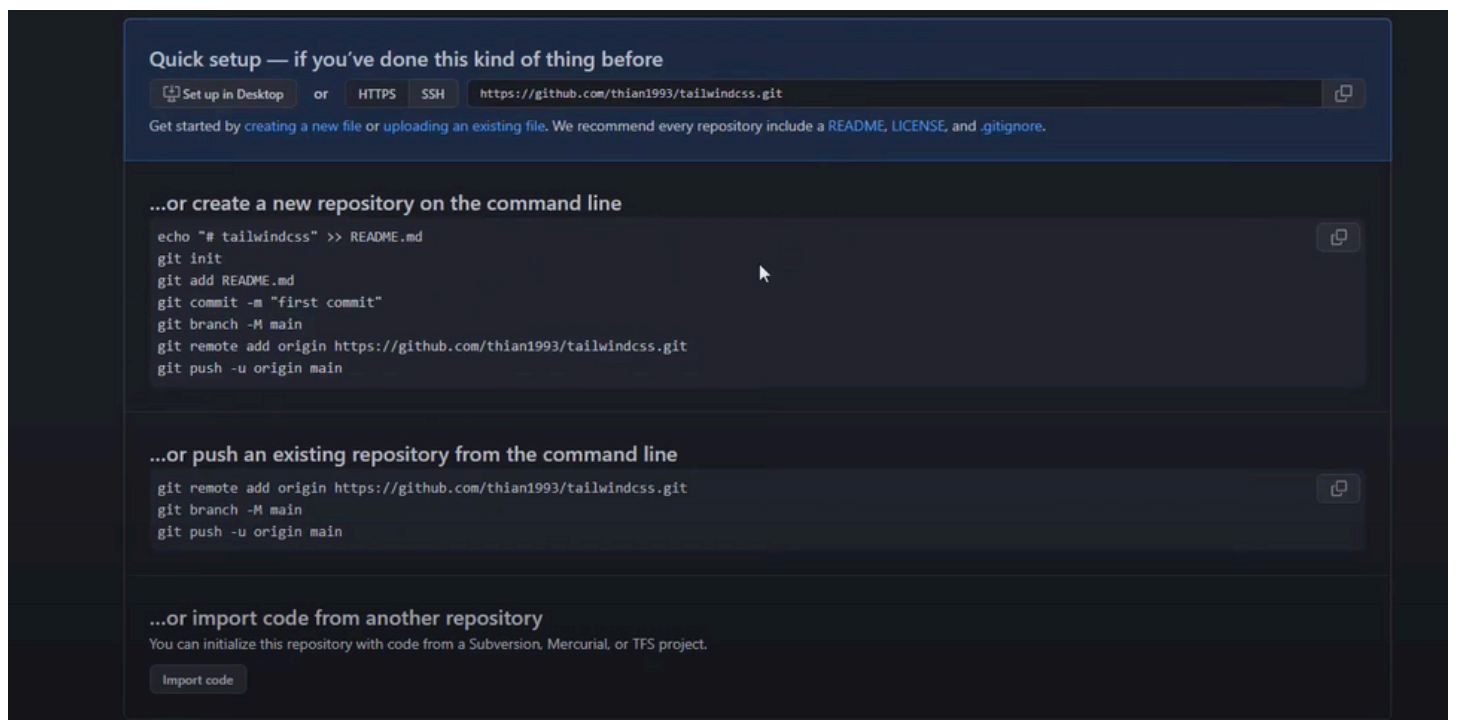

☐ **Add a README file**
This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**
Choose which files not to track from a list of templates. [Learn more.](#)

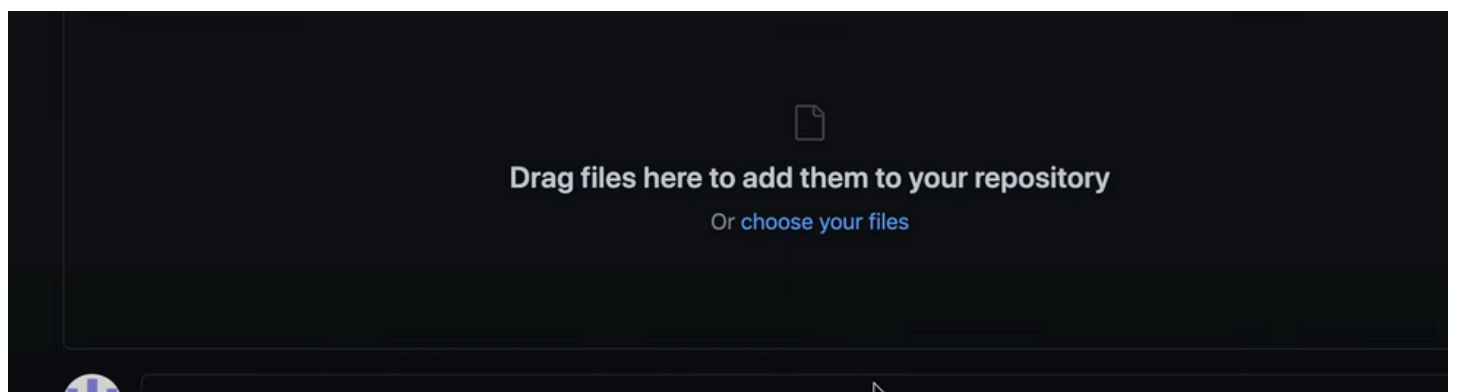

☐ **Choose a license**
A license tells others what they can and can't do with your code. [Learn more.](#)

Create repository

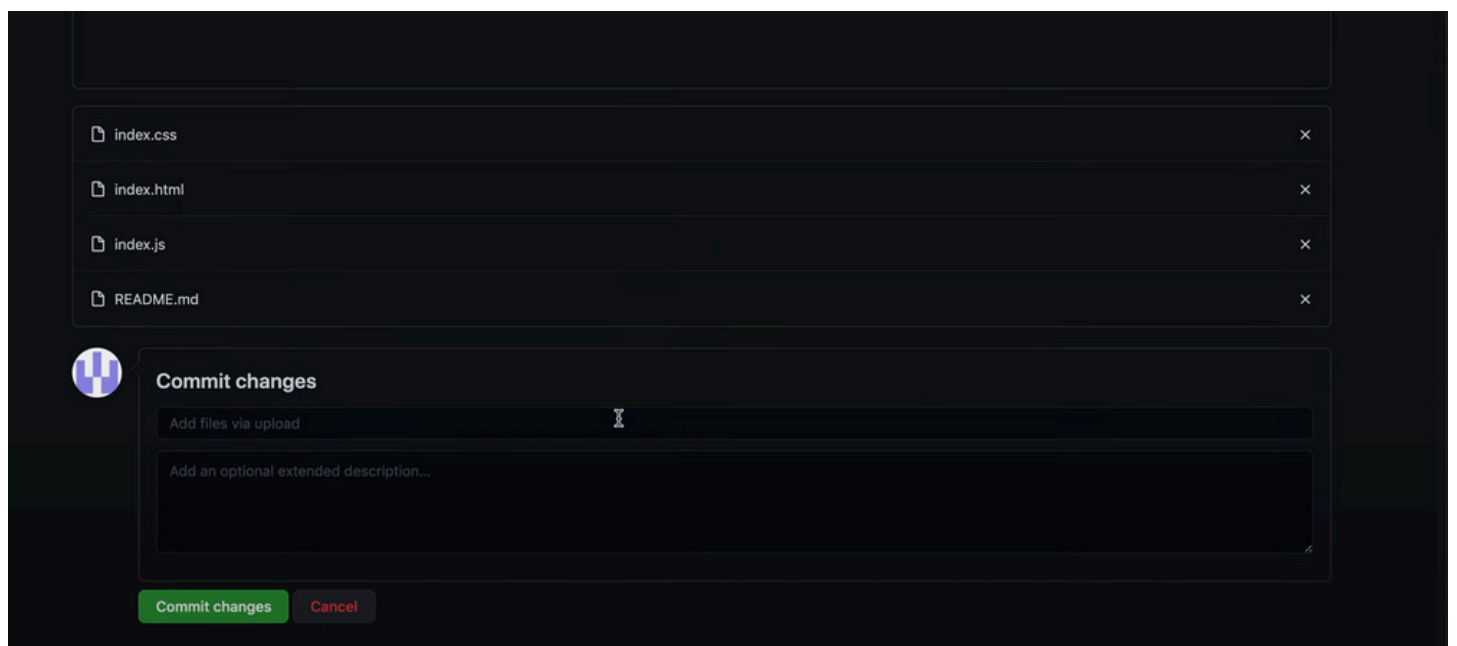

al crear el repositorio iremos donde dice uploading an existing file

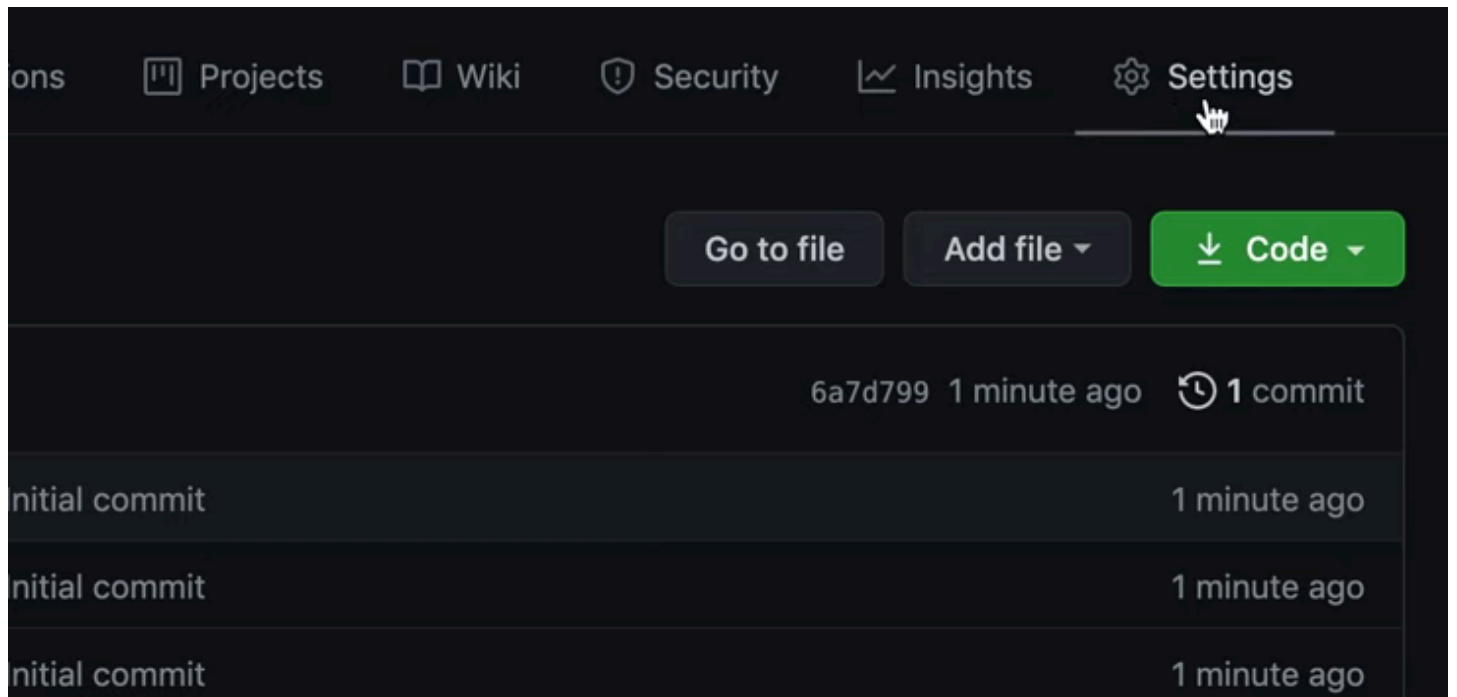

nos aparecera este apartado donde podremos subir nuestros proyectos web

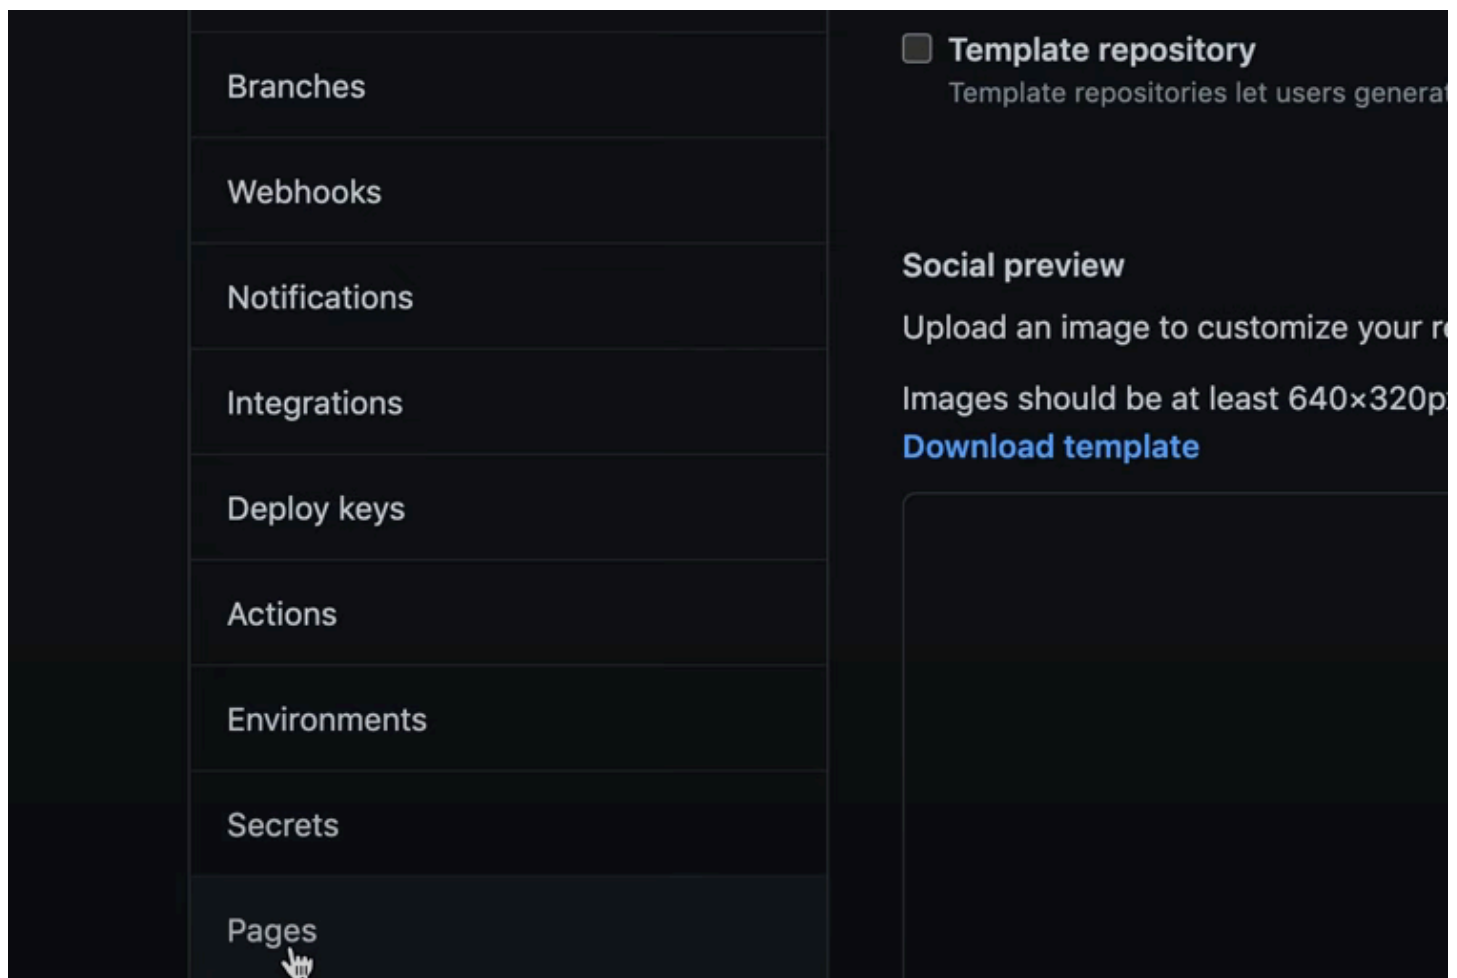

Al subir tu proyecto, presionaras commit changes

Luego vamos a configuracion o setting

AL ingrsar a configuracion nos deregiremos donde esta pages

entoces te dara el link de donde estara tu pagina web que subiste

GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

✓ Your site is published at <https://cifradorcesar.github.io/>

Source

Your GitHub Pages site is currently being built from the main branch. [Learn more.](#)
